DETAILED ACTION

103 Rejections Withdrawn

The rejection of claims 1-4 under 35 USC 103(a), outlined in the previous Office Action, is withdrawn. Applicant's arguments have been carefully considered and are persuasive. The rejection is untenable.

Claim Objections Withdrawn

The objection to claims 5-7, as being dependant from a rejected base claim but otherwise allowable, is withdrawn.

Claim Objections, NEW

Claims 1-7 are objected to because of the following informalities: there are a number of instances of non-standard English grammar in the claim text, for instance, in claims 1 and 2, line 6: "...comprising *by* [emphasis added] reacting..."; claim 2, 4th line from the end: "...and conducting to a [emphasis added] Curtius reaction...". Other instances are similar. Appropriate correction is required.

Claim Rejections - 35 USC § 112, NEW

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1621

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The meaning of the proviso clause is unclear. That is, it is unclear what is being exclude or not excluded from the definition of R^{2-5} . (This may be a grammatical problem, vide supra.)

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim states that the variable definitions "...have the same meanings as defined above...". However, there is insufficient antecedent basis for this limitation in the claim. Claim 2 is written as an independent claim.

The remaining claims are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

Claims 1-7 would be allowable once the above objections and rejections have been overcome. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art appears to be Bertau et al., the prior art of record for the withdrawn 103(a) rejection (and discussed as well by applicant in the specification). As applicant cogently points out in the reply to the previous Office Action, Bertau et al. neither teaches nor suggests the instant process. Nor would it have been obvious to

Art Unit: 1621

one of ordinary skill in the art at the time of invention to modify the process of Bertau et al. in order to arrive at that of the instant invention. There is no motivation to do so.

Conclusion

The various objections and rejections outlined in this Office Action should have been made in the Office's previous communication with applicant. The examiner regrets the error
